

LUCIEN MARCEL COTÉ

Analytics Engineer | Data Systems Engineer | BI Developer

Norridgewock, ME | lucmcote@gmail.com | (360) 440-5370 | luccote.com | LinkedIn

PROFESSIONAL SUMMARY

Analytics and data systems professional with 18+ years of cross-disciplinary experience designing reporting systems, workflow automation, dashboards, technical pipelines, and operational tools across healthcare, government, software, VR simulation, and AAA production. Strong fit for remote, deep-focus roles requiring SQL, Power BI, Crystal Reports, Python, Azure, SharePoint, automation, and the ability to translate messy operational systems into clear, usable intelligence.

CORE TECHNICAL SKILLS

Data & BI

SQL Server, T-SQL, SSMS, Power BI, Crystal Reports, data modeling, reporting, KPI dashboards

Automation & Cloud

Power Automate, SharePoint, Azure, workflow design, forms-to-database processes

Programming

Python, C#, JavaScript, React, Redux, HTML, CSS, Visual Studio, VS Code, Git

Visualization Systems

GIS dashboards, 3D visualization, Unity, Unreal, Maya pipeline tools, technical documentation

SELECTED ACHIEVEMENTS

- Built SQL-based reporting and workflow automation for healthcare operations using SQL Server, Crystal Reports, Power BI, SharePoint, and Power Automate.
- Developed internal analytics platforms and visual tools using Azure, React, SQL, Salesforce integrations, and Power BI at Netrush.
- Led municipal systems modernization, GIS visualization, dashboards, and database-supported communication systems for the City of Casper.
- Created production pipelines and technical tools across AAA games, film, VR simulation, and software teams, bridging artists, engineers, analysts, and stakeholders.

PROFESSIONAL EXPERIENCE

Report Writer & Database Analyst - Sweetser | Maine | 2025-Present

- Support clinical and operational reporting through SQL Server queries, Crystal Reports, Power BI dashboards, and data-quality workflows.
- Design workflow automation connecting Microsoft Forms, SharePoint, Power Automate, and SQL-backed reporting structures.
- Translate complex healthcare data requirements into reliable reports, intake/attendance workflows, and reusable query logic.

Software Developer - Netrush | Vancouver, WA | 2017-2019

- Built internal analytics platforms and marketplace planning tools using Azure, React, Redux, JavaScript, C#, SQL, and Power BI.
- Created custom visuals and dashboards by combining data from Azure, Salesforce, and internal server systems.
- Supported migration from Salesforce-centered workflows to customized in-house analytics and platform tooling.

Systems Analyst - City of Casper | Casper, WY | 2015-2017

- Led web, dashboard, database, and project-management initiatives for municipal technology modernization.
- Built GIS-based 3D city models and spatial visualizations using ArcGIS, CityEngine, SQL, Power BI, SharePoint, and Unity.
- Designed public-facing and internal tools that improved communication, planning, and technical transparency.

3D Generalist III / Technical Mentor - Street Smarts VR | *Remote* | 2023-2024

- Supported government and military VR training simulations through Unity pipelines, optimization, technical planning, and production coordination.
- Improved real-time workflows and simulation fidelity while mentoring junior developers and coordinating cross-disciplinary work.

Character Artist / Team Lead - Team Bondi / KMMIE with Rockstar / Warner Bros | *Sydney, Australia* | 2008-2013

- Led character art production and technical troubleshooting for L.A. Noire and Project WOTO.
- Worked with programmers on shader controls, point-cloud workflows, and artist-facing technical systems.

EDUCATION

Bachelor of Science, Game Art and Design - The Art Institute of Portland, 2004-2007
